Cristian Patricio Contreras

Senior Software Engineer | Android & Technical Leadership

Buenos Aires, Argentina
pato9406@gmail.com | +54 11 6891-5184 | linkedin.com/in/cristianpatriciocontreras

Software engineer specializing in Android, with 12 years of professional experience in consumer applications, connected devices and notification systems. Combines application ownership with technical leadership across mobile and backend teams. Has worked fully remotely for the past seven years.

EXPERIENCE

Citizen | 2021-Present | Fully remote
Senior Android Engineer | Tech Lead since 2026

- Built complex Android map experiences using MapLibre and Mapbox.
- Led technical planning across mobile and backend, assessing feasibility, simplifying scope and coordinating work with product, design and the CEO.
- Proposed and designed a notification-volume experiment informed by product use and user feedback to test whether fewer low-relevance alerts could improve retention.
- Integrated Superwall into Android subscription flows, instrumented paywall analytics, and coordinated experiments and rollout with product and data teams.

Equinox+ / SoulCycle | 2020-2021 | Fully remote
Senior Android Engineer

- Integrated pedal-mounted ANT+ hardware into an Android video application for exercise bikes, supporting calorie tracking during workouts.
- Handled APK releases for devices running the application in kiosk mode.

VieMed Healthcare | 2019-2020 | Fully remote
Senior Android Engineer

- Implemented Bluetooth integration with Philips ventilators, using a documented proprietary protocol without an SDK to retrieve and upload therapy data for clinical review.
- Maintained a Samsung tablet application for patients with advanced COPD, supporting daily health questionnaires and video consultations through OpenTok.

Restorando / TheFork | 2016-2019
Android Engineer

- Owned Android development for extended periods as the sole Android engineer; also contributed to Ruby on Rails, iOS and React applications.
- Continued at TheFork after Restorando's acquisition, collaborating remotely with an engineering team in France.

Pigmalion Studios / Mundo Descuento | 2015-2016
Android Developer

- Built Android applications for US clients at Pigmalion, including a video-based language-learning app using ExoPlayer. Subsequently developed Mundo Descuento's Android application in a small startup team.

TECHNICAL SKILLS

Android: Kotlin, Java, Jetpack Compose, Coroutines, MapLibre, Mapbox, ExoPlayer
Integrations: Bluetooth, ANT+, OpenTok
Additional development: Go, Node.js, PostgreSQL

TEACHING

Universidad Tecnológica Nacional | 2015-2022
Taught classes and reviewed student projects in advanced programming and software engineering, covering Ruby metaprogramming, Scala and the business implications of technology choices.

EDUCATION

Ingeniería en Sistemas de Información (Information Systems Engineering)
Universidad Tecnológica Nacional | Graduated December 2017
